

PaperTech

Product details

- More sustainability and product protection, less plastic
- Improved forming of paper-based film
- Higher packaging stability

Weber PaperTech technology: paper-based underfilm for more stable and deeper packaging.

In an effort to reduce the use of plastic, fiber-based films using renewable raw materials are gaining ground worldwide. One look at the cooler isle of supermarkets reveals that food products such as sliced meats and cheeses are increasingly packaged in composite materials based on paper with a thin PE film. The optimal and profitable production of such packages however, is a challenge for most thermoforming packaging machines. Weber's PaperTech technology alleviates these issues. The main advantage of PaperTech process is that paper-based bottom films can be formed much easier and deeper into packaging. The obvious benefits for food producers and retailers are that the packaging can hold more product and is more shelf-stable.

Advantages

- Sustainable and profitable processing solution for fiber-based food packaging
- Paper fibers are easier to shape and achieve higher stability after cooling.
- Retrofitting of Weber wePACK packaging machines is easy and possible without requiring additional space

Weber means: service across the board.

Weber Upgrades make it possible.

New tasks, old machines?

The tasks and challenges in production have grown? To meet this, we offer a wide variety of upgrades for existing lines that are optimally suited to new requirements: whether retrofitting individual components to optimize production or automating existing lines to raise hygiene standards. This is sustainable and economical - and also allows you to stay up-to-date and grow with a manageable investment.

Weber Guardian.

A safe plan for your production.

Only those who listen can understand. And those who understand can act. With our Weber Guardian program, we harmonize people, machines, and processes to get the most out of production. From preventive maintenance and inspection through targeted personnel development to production support and optimization.

Weber Portal.

Networked thinking, handling together.

You will find everything about your Weber equipment bundled in your personal Weber Portal. Compact, individual and interactive. From your customer profile and that of your machines to e-learning on your setup as well as convenient spare parts ordering and service offers. Are you already registered?

We are looking forward to hearing from you.
